

LESSON 6: ANGELS.

What Are Angels

Angels are highly evolved spiritual beings. Angels are appointed by the source (or God) to help with, & oversee all aspects of physical creation throughout the universe. They receive the divine energy from source, & through the various orders or hierarchy, direct this energy down into the physical planes.

Only the very highest order of angels are able to receive the highest vibration of energy that is the divine energy of the source or God-Force. This energy is then converted into the vibration of creation by the angels, and is passed down through their hierarchy system to eventually become the universe that we live in. All of the physical matter that exists in the universe that we know, is energy from source that has been directed down through the Angels. This includes all of the galaxies & stars, the planets & all of the life that exists on any planet.

Hierarchy Of The Angels

There are many opinions on how many orders of Angels there are, but it is generally believed that there are three main levels & each of these levels is again divided into three sub-levels.

The highest level are the Seraphim, Cherubim & Thrones.

The second level are the Dominions, Virtues & Powers.

The lowest level are the Principalities, Archangels & Angels.

The highest order of Angels are the Seraphim. These are the only beings that can receive the divine energy from the source. They are of the highest vibration who's essence is pure love.

The Cherubim, also known as the angels of wisdom, are the guardians of the stars & the celestial heavens. They spread the energy of creation throughout the universe.

The Thrones are the guardians of the planets. The Throne that looks after the Earth is Ezekiel. They can receive the high level of energy as it is spread through the universe from the Cherubim & then transmit it at a level that can be accepted by the lower orders of planet based angels.

The Dominions are angels that over see the lower orders of the angelic realm. They help to create a smooth transition between the spiritual & material planes.

The Virtues are the angels that can make miracles happen here on earth. They send out beams of light that can be accessed by humans. When you tune into the energy of the angels, you are accessing the energy & knowledge that is radiated by the Virtues.

The Powers are the angels who look after Karma, they are therefore in charge of our personal karmic records & the Karma of the world as a whole. The angels of birth & death are also Powers. These are the angles that over see our souls transition into our physical body at birth & when we leave our body at the end of our earthly lives.

The Principalities protect large structures of people, from large multinational companies up to cities or even whole nations. However they do not deal with individual people on a personal level.

The archangels are the angels that are often referred to in many religions around the world. There are millions of archangels throughout the universe but those that are most closely associated with the earth are Michael, Gabriel, Raphael & Uriel. They oversee large projects for spreading the light & raising the energy level & consciousness of humanity. As do other archangels for life forms on other planets throughout the universe. Archangels lead bands of lower ranking angels to aid them in their tasks. Archangels can also be called upon by individual people to help us with protection, cleansing & healing.

The lowest rank is that of Angels. These are the helpers of the Archangels & are the angels that work directly with human kind. Every single person has their own Guardian angel. They guide us from birth & are available to help us in many ways, they heal us, inspire us, help to smooth our path through life, fill us with higher energies & help us spread the light. However they cannot interfere with our free will so we must ask the angels for this help whenever we feel that we need it. Our Guardian Angels also record our thoughts as well as our actions here on earth & they keep our Akashic records which are overseen by the Lords of Karma.

Angel Wisdom & Religion

Although angels are referred to in many religions, they serve the light & the light is beyond religion although it honours & accepts all religions. We are all here to learn our lessons & ascend back to our source, which ever path we choose to take on this journey is the right path for us. Rather like climbing a mountain, there may be many routes to the peak but each route will have its own challenges along the way. These challenges may include hurt or disaster but they provide our lessons from which to learn. Sometimes though we need some help along the way, it is often from the pit of deepest despair that people will call out for help, and it is the angels that come to their aid.

There are many that unknowingly work against the light. Often in the name of God. They try to control how people will learn their lessons and teach that their way is the only way, but in doing so they take away that persons power to choose the path that is right for them.

Connecting With The Angels

The most common way people hear messages from their Angels is through their intuition, their feelings but in order to receive guidance from the Angels you must first ask for it. Although there are Angels around us all of the time they cannot interfere with our lives unless we consciously ask for their help. This is because they cannot interfere with our free will.

Angels will send messages in many ways, these can be in the form of coincidences. For example if the Angels feel that you could benefit from reading a particular book, that book may fall off a shelf as you walk past it. Or you may just get a feeling that you should take a different route to work & in doing so you bump into someone who can provide help to you in some way. If you ask the Angels for their help it is important to lookout for these coincidences or signs. If you keep hearing or seeing a particular word or phrase, try to think about what it could mean to you. This also goes for your dreams as Angels can use your dreams to give you a messages as well. However the most important thing you must do is listen to your intuition. If you get a feeling about where to go or what to do, try not to think about it too much but instead just go with it, go with your gut feeling. Angels will also leave white feathers in your path. If you have asked for their help & later you see a white feather on the ground, this is a sign that the angels are around and have heard you.

Angels can communicate with us directly, however to receive messages in this way you must be very open & intuitive. Some people are naturally sensitive enough to do this but for most people it takes a lot of psychic & spiritual development work in order to connect directly to the Angels. As

you progress on your spiritual path your intuition will grow and you may eventually be able to connect with the Angels directly. The best way to help you develop enough to do this is through meditation. In particular guided meditations where you are first taken into a state of deep relaxation before being guided through a scenario where you can communicate with the Angels, are often the most effective.

Meet Your Angel Exercise.

1, Make sure you are as comfortable as possible. Now gently close your eyes. Take a few deep breaths. With each breath take as much air in as possible, through your nose, hold it for a second and then gently and slowly breath out again. As you do this, invite your body to relax, and feel yourself letting go of any tension as you breath out.

2, Now begin to breathe normally. Invite your Guardian Angel to come close to you.

3, Feel its gentle energy surround you with warmth and love. As it dose you feel safe and relaxed.

4, Try to imagine what your Guardian Angel looks like, is it male or female? Can you see its face or does it just appear to you as a figure?

5, Now ask your Guardian Angel its name. Maybe only part of its name or its initial will come to you, or maybe nothing will come at all. Don't worry if this is the case.

6, Feel the love and security of your Guardian Angel, now become aware of other Angels around you and feel their love surround you as well.

7, Take in a deep breath, and as you do so take in all of the love that the Angels are giving to you.

8, Take in two or 3 more deep breaths, feel the love from the Angels fill your body and as you do so remind yourself that you deserve to be loved.

9, When you feel ready, gently open your eyes.
